

Assignment 3

1) Does ANSI recognize the data type DATE?

==> Yes ,ANSI recognize the data type DATE

as DATE is the the datat type where we can store date in the format of 'yyyy-mm-dd'

DATE datatype supported by most of RDBMS

we can perform operations using DATE Datatype like ading subtracting the date

2) Which subdivision of SQL is used to insert

values in tables?

==> to insert the data into the table we use insert into statement

through insert into statement we can insert values in the table

the values which we are inserting should in the same datatype which is used while creating table
syntax

```
insert into table_name values('Akshay',23,'DMC');
```
